Guntur, Andhra Pradesh

Professional Summary

Information Technology undergraduate with strong foundation in IT systems, database management, and application security principles. Experience developing structured web applications incorporating authentication controls, validation mechanisms, and data integrity practices. Strong interest in IT General Controls (ITGC), application controls, risk identification, and technology assurance within consulting environments.

Education

B.Tech in Information Technology

2023 – 2027

Vignan's Foundation for Science, Technology & Research

GPA: 7.5

Technical Skills

Core Areas: IT General Controls (Conceptual), Application Controls, SDLC Basics, Risk Identification, Database Integrity

Programming: Python, C, C++

Web Technologies: HTML, CSS, JavaScript, REST APIs

Frameworks: Django

Databases: MySQL, SQLite

Tools: Git, Postman, VS Code

Experience

Full Stack Web Development Intern

Jan 2025 – May 2025

BootSpring

- Designed and implemented authentication mechanisms with role-based access control to restrict unauthorized system access.
- Developed REST APIs incorporating structured input validation and exception handling to minimize system vulnerabilities.
- Conducted functional testing and debugging to identify logical errors and system reliability gaps.
- Documented system workflows and application logic to improve traceability and maintainability.

Projects

LuxDrive Portal – Vehicle Rental Management System

May 2025

- Designed structured database schema with enforced constraints to maintain transactional consistency.
- Performed basic risk assessment of booking workflows to identify potential failure points.
- Maintained technical documentation outlining system architecture and data flow.

Student Attendance Tracker – Academic Monitoring System

April 2024

- Automated attendance processing, improving recording efficiency by 60%.
- Developed reporting dashboard for monitoring, exception tracking, and performance analysis.
- Ensured auditability through structured relational database design.
- Tested system logic to identify and resolve edge-case failures.

Certifications

TCS iON Career Edge – IT for Non-IT

Jul 2025

TCS iON Career Edge – Young Professional

Jul 2025

Technology Apprenticeship (Job Simulation) – Accenture & Deloitte

2025
